Applications

➤ **Switcher Mode:** When the output capacity is 4K, two output connectors work as primary and the other six work as backup. When the output capacity is DL, four output connectors work as primary and the other four work as backup. The P20 can work with the U5 or U5 Pro event controller. The following uses the U5 as an example.

➤ **PGM Only Mode:** When the output capacity is 4K, four output connectors work as primary and the other four work as backup. When the output capacity is DL, four output connectors work as primary and the other four work as backup. The P20 can work with the U5 or U5 Pro event controller. The following uses the U5 as an example.

P20+U5+PixelFlow

Change Working Mode

The P20 can work in switcher mode or PGM only mode. Users can switch between the two modes as required.

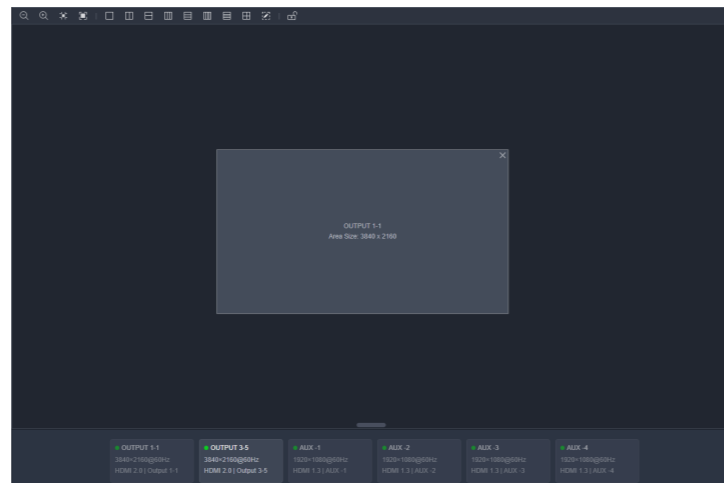

- 1 Select **Device** on the left of PixelFlow homepage.
- 2 On the right of the page that appears, set **Working Mode** to **Switcher** or **PGM Only**.

Configure Screens

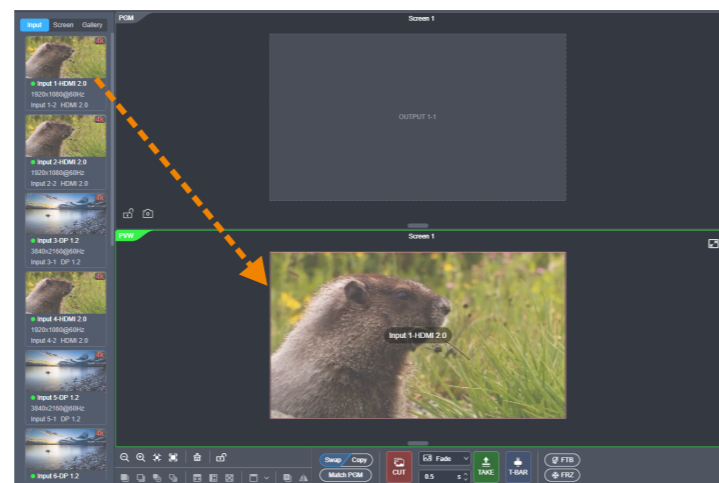

Users can add screens and add desired output connectors to the screens.

- 1 Select **Screen** on the left of PixelFlow homepage.
- 2 Tap **+** to add a screen. Tap a screen name to select the screen.
- 3 Drag an output to the canvas to complete screen configuration. To change the output, drag another output to the target area.
- 4 On the right of the page, set screen properties as required.

Add Layers

- 1 Select **Programming** on the left of PixelFlow homepage.
- 2 Tap a screen name to select the screen, or select **Multiple select** and tap to select multiple screens.
- 3 Add layers to the screen.
 - Common screen: Drag an input source to the screen to add a layer.
 - AUX screen: Drag an input source or PGM to the screen to add a layer.

Switch from PVW to PGM

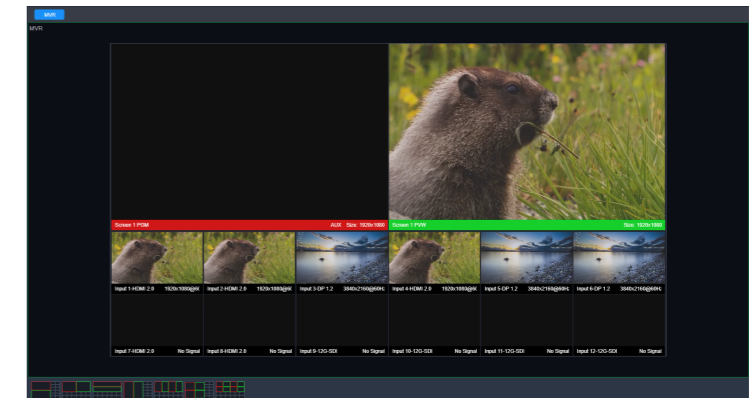

- Swap: Swap the contents on the PVW screen and PGM screen.
- Copy: Copy the content on the PVW screen to the PGM screen.
- Cut: Switch the content on the PVW screen to the PGM screen with no transition effect.
- Take: Switch the content on the PVW screen to the PGM screen with a specified transition effect. Users can specify the transition duration.
- T-Bar: Switch the content on the PVW screen to the PGM screen with a specified transition effect. Users can control the transition duration by dragging the virtual T-Bar.

Set Multiviewer

The P20 supports live monitoring of all the input sources, PVW and PGM.

- 1 Select **Multiviewer** on the left of PixelFlow homepage.
- 2 Select a Multiviewer template from the bottom of the page.

Switch Between Presets

Up to 128 presets can be saved by the P20. A preset includes screen and layer information. Presets can be quickly loaded.

- 1 Select **Programming** on the left of PixelFlow homepage.
- 2 On the right of the page, tap a preset to load it.
 - Switcher mode: The preset is loaded to the PVW screen. Go to step 3.
 - PGM only mode: The preset is loaded to the PGM screen and no further action is required.
- 3 Tap **Cut** or **Take**, or tap **T-Bar** and drag the virtual T-Bar to switch content from the PVW screen to PGM screen.

* All the software pictures given in this guide are for illustration purposes only. The actual user interface may vary slightly due to product enhancement. The content of the pictures can be slightly different from reality, such as the form and position of software windows, input source images and more.
